Re: Public Works Related Internships

Dear Colleague:

Remember when you were a student looking for a career-related summer job or your first job? If you were like me, you probably had trouble finding a job because you had no experience and you couldn't get experience without that job! Perhaps you are looking for experienced technical workers now and are wondering where all the qualified and experienced workers have gone.

Central Texas TPWA is asking you to do your part in stopping that cycle. It's as simple!

1. Write a brief job description, including job location, desired qualifications, length of work term, contact name, email and phone number, etc.
2. Email the description to Jason Watts at jwatts@agileassets.com
3. Interview the candidates who apply for your position.

Central Texas TPWA will place your ad with college career centers throughout Texas or just the schools you indicate. Come On! Do something good for a deserving student, for our industry and for your organization! We have even included a simple application form to help you get started.

Thank you for your help in getting this initiative off the ground.

Sincerely,

Central Texas TPWA Internship Committee

Jason Watts, Chair
Kristina Ramirez, EIT
Thomas Valle, P.E.
